Hola Jordi

He contactat amb la Irene Epifanio, que va desenvolupar el archetypoids. Crec qu t'anirà bé el que escriu a sota.

Parlem

Dani

Subject: Archetypoids

Hola Dani,

no m'agrada com estan les funcions en adamethods, per què estan massa carregades.

Crec que és més fàcil gastar el següent:

#finding RSS-archetypoids for different K, beginning for three initializations and using the minimum RSS of each three. Screeplot.

```
set.seed(2016)
```

```
norep=20
```

```
lass10d <- stepLArchetypoids3(data=X, k=1:10, norep)
```

```
screeplot(lass10d)
```

```
#elbow
```

```
numarq=4; #elbow
```

```
#narquetipoides contains the individual numbers which are archetypoids
narquetipoides=lass10d[[numarq]][[1]]
```

Eixa funció està en: <http://www3.uji.es/~epifanio/RESEARCH/laa.rar> de Irene Epifanio, M.Victoria Ibáñez, Amelia Simó. Archetypal shapes based on landmarks and extension to handle missing data. Advances in Data Analysis and Classification, 2018, 12(3): 705-735.

Després, eixa implementació l'he gastada en altres articles, com en:

A. Alcácer, Irene Epifanio, M.Victoria Ibáñez, Amelia Simó, A. Ballester. A data-driven classification of 3D foot types by archetypal shapes based on landmarks. PLoS ONE, 15(1): e0228016. DOI: <https://doi.org/10.1371/journal.pone.0228016>, 2020.

Codi en: https://figshare.com/articles/code/adafeet_rar/11553324?file=20766336

i també estarà en adamethods en algun lloc, però com dic, molt recarregades...

Altre exemple de com usar-lo, i com traure alfas corresponents (en ae):

```
set.seed(1234)
aa3srt=stepLArchetypoids3(scale(toy), k=1:5, norep=20)
screeplot(aa3srt) #3 elbow
```

```
set.seed(1234)
aa3sr=stepLArchetypoids3(scale(toy), k=3, norep=20)
```

```
#271 13 144
```

```
ua3r <- toy[c(13,144,271),]
```

```
#alphas
huge=200
k=3
```

```
n <- ncol(t(toy))
x_gvv <- rbind(t(toy), rep(huge, n))
zs=x_gvv [,c(13,144,271)]
```

```
ae <- matrix(0, nrow = k, ncol = n)
```

```
for (j in 1 : n){
  ae[, j] = coef(nnlsl(zs, x_gvv[,j]))
}
```

Crec que en ada_methods correspon amb: archetypoids_norm_frob

Una abraçada!
